Our products are used in various applications such as cutting, grinding, and polishing of different materials. The products are designed to meet the requirements of different materials and applications. The products are available in different sizes and quantities. The products are used in various industries such as construction, mining, and manufacturing. The products are used in various applications such as cutting, grinding, and polishing of different materials. The products are designed to meet the requirements of different materials and applications. The products are available in different sizes and quantities. The products are used in various industries such as construction, mining, and manufacturing.

## Applicable materials

To meet your demands for cutting different materials, such as granite, marble, quartz stone, sand stone, microcrystalline stone, volcanic rock, concrete, glass, ceramic, masonry etc. Different segments recipe were been developed by our company.

# Diamond Saw Blade Cutting

Less than 45kg, generally delivery by express(Door to Door).

By Air or by Sea for batch goods, Airport/ Port receiving

By air

By sea

**By Air:**

1. **Weight and Volume:** Air freight is suitable for goods with a weight of less than 45kg and a volume of less than 3m³.
2. **High Value Goods:** Air freight is suitable for high value goods, such as electronics, pharmaceuticals, and fresh produce.
3. **OEM Products:** Air freight is suitable for OEM products, such as spare parts, tools, and equipment.
4. **Perishable Goods:** Air freight is suitable for perishable goods, such as fresh produce, seafood, and flowers.
5. **Urgent Goods:** Air freight is suitable for urgent goods, such as emergency supplies, spare parts, and equipment.

**By Sea:**

1. **Weight and Volume:** Sea freight is suitable for goods with a weight of more than 45kg and a volume of more than 3m³. It is the most economical way to transport large quantities of goods.
2. **Low Value Goods:** Sea freight is suitable for low value goods, such as raw materials, bulk goods, and general cargo.
3. **Non-Perishable Goods:** Sea freight is suitable for non-perishable goods, such as industrial machinery, construction equipment, and furniture.
4. **Long-Distance Goods:** Sea freight is suitable for long-distance goods, such as goods from Asia to Europe or America.
5. **Urgent Goods:** Sea freight is suitable for urgent goods, such as emergency supplies, spare parts, and equipment.
