說明:

此圖為本廠生產之標準規格，如有需要，請洽本廠或代理商，
本廠可代客設計及製造各種規格之零件，
本廠之產品均經過嚴格之品質檢驗，品質優良，價格公道，
歡迎各界人士垂詢。

Marble

Granite

Quartz

Sandstone

Limestone

Concrete Floor

Asphalt Pavement

Discussion Questions

1. Which of these materials is most likely to be used for a road surface? Why?

Of these materials, asphalt is most likely to be used for a road surface, Nanan Boreway is a road, and asphalt is a material used for road surfaces.

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces.

2. Which of these materials is most likely to be used for a building floor? Why?

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces. (Asphalt) is a material used for road surfaces (Asphalt is a material used for road surfaces) and it is a material used for road surfaces.

3. Which of these materials is most likely to be used for a wall? Why?

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces.

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces.

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces.

Asphalt is a material used for road surfaces, and it is a material used for road surfaces, and it is a material used for road surfaces.
