

Introduction:

5inch 125mm Vacuum brazed Diamond Grinding Disc Sanding Pads are an essential tool when professionally de-lipping any floor and any material. These pads feature a single layer of diamonds, brazed to a rigid backer. Use with our foam riser when lippage is significant, the riser acts as a shock absorber. Brazed pads are super aggressive as 100% of the diamonds are in in contact with the surface rather than suspended in a matrix of metal or resin. Our brazed pads are also a great option for light coating removal.

Feature:

1. Environment friendly
2. For stone, concrete, brick, tile, glass, fiberglass, etc
3. Perfect safety, excellent fast, high efficiency and complicated shape
4. Rather longer life than the electroplated tools, similar to sintered type
5. Various diamond grain and grade to meet various application-cutting, drilling, grinding

Specification:

Specification of 5inch 125mm Diameter Dry Wet Use Vacuum Brazed Diamond Polishing Pads and Diamond Grinding Disc Sanding Pads

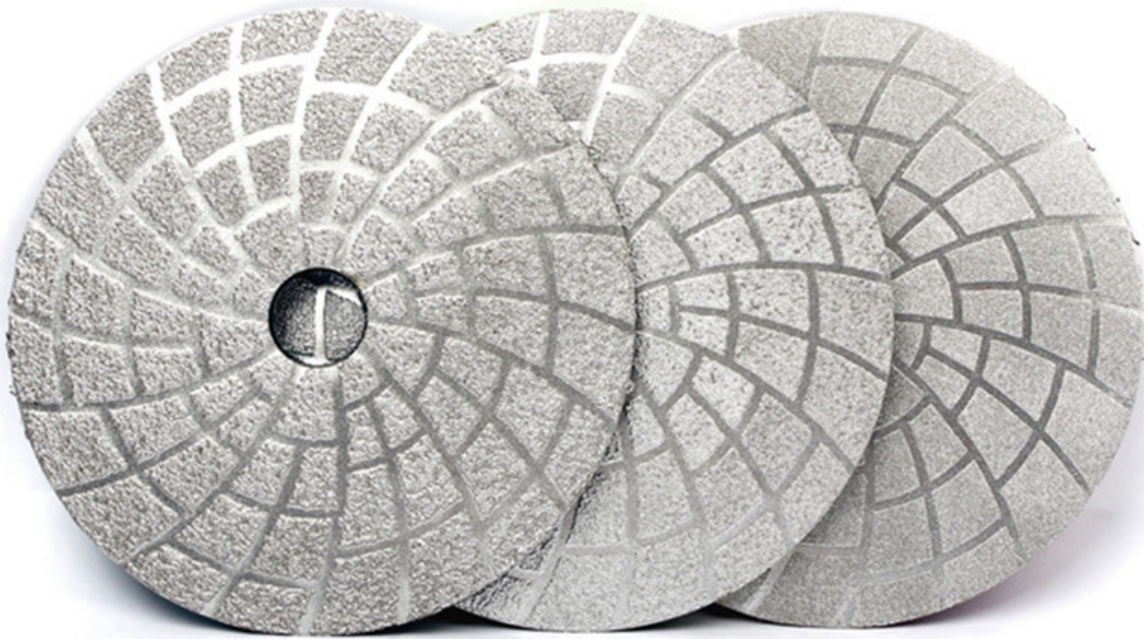

Diameter	Application	Holder	Material	Grit No.	Machine
3inch/4inch/5inch	kind of stone like granite,marble	Velcro	Diamond+Resin	30#,50#,100#	Hand-held machine polishing machine

Special application and design are available upon request
