

Introduction:

Brazed diamond fickerts are widely used for grinding slabs of granite,marble,quartz and ceramic from coarse to fine. These fickerts are used on automatic continuous polishing machines with high efficiency and long lifespan,cost lower than magnesia grinding blocks.

Features:

- 1.Segmented brazed construction allows better debris removal and better cooling.
- 2.It's sharpness can reduce the pressure of grinding head,therefor reduce machines abrasion.
- 3.It's super sharpness can improve transmission speed of convey belt and improve the production efficiency.
- 4.It can bring 10 degree more in stone high glossiness,without scratch or break slates while grinding.

Specifications:

The followings are the normal specifications of our brazed diamond fickert:

Product Name	Model	Specifications	Normal Grit	Applications
Brazed Diamond Fickert	T140	140*56*15(20)	36# 46# 60# 80# 100# 120# 140# 180# 240# 320#	Granite Marble Quartz Ceramic
	T170	170*56*15(20)		

The above specifications are for reference, other specifications can be ordered by customers.
Quality: Good quality,Premium.
