

Introduction:

T segment diamond core drill bits are suitable for stand drilling machine, electrical hand-held drillers or CNC machines for dry drilling small projects such as drilling our sinkholes for faucets or small holes on slabs. The T segments are welded into the steel pipe and will not easily fall down from steel.

Features:

1. Applicable for most stand drilling machines, hand-held drillers or CNC machines.
2. These drill bits are mainly for dry use.
3. Good balance and stable performance.
4. High efficiency and longer lifespan.
5. Diamond electroplated on the surface of steel pipe.

Specifications:

The followings are the normal specifications of our crown segment diamond core drill bit::

Product Name	Diameter	Segment Size	Length	Adaptor	Applications
T Segment Diamond Core Drill Bit	32mm (1-1/4")	16x3x10	4"(100mm)	5/8"-11 M14 1/2 Gas	Granite Marble Artificial Stone Quartz
	35mm (1-3/8")	16x3x10			
	38mm (1-1/2")	16x3x10			

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Normal, Good quality, Premium.
