

Introduction:

These diamond sintered continuous rim blades are widely used on manual hand held cutting machines for wet cutting and nondestructive grooving on marble, granite, ceramic tile, concrete and many other general construction materials.

Features:

1. Good continuity, good cutting sharpness and high cutting efficiency.
2. Designed for hand held circular saws and most angle grinders.
3. Fast and smooth cutting, free chipping, high performance/price ratio.

Specifications:

The followings are the normal specifications of our diamond sintered continuous rim blades:

Product Name	Outer Diameter		Segment Width		Arbor	Segment Height	Applications
Diamond Sintered Continuous Rim Blade	inches	mm	inches	mm	mm	mm	Marble Granite Porcelain Tiles
	4"	105	0.070"	1.8	16/20	5mm	
	4.3"	110	0.070"	1.8	22.23	5mm	
	4.5"	115	0.080"	2.0	25.4/50	12mm	
	5"	127	0.080"	2.0		8mm	
	6"	152	0.085"	2.2		8mm	
	7"	178	0.095"	2.4		8mm	
	8"	203	0.095"	2.4		8mm	
	9"	229	0.110"	2.8		8mm	

The above specifications are for reference, other specifications can be ordered by customers.

Grade: Premium, Standard.
