

Introduction:

Continuous diamond stubbing grinding wheel milling Milling granite, marble, quartz and other stone for CNC machines and other equipment, this diamond stubbing wheel with high efficiency, speed, long life, precision molding characteristics.

Features:

- 1. Unique design can be easily dust, low noise, safe, precise molding
- 2. Which milling round diamond high precision, smooth surface suitable for stone processing.
- 3. GrindingLife can usually reach more than 450 meters.
- 4. Other sizes can be customized according to customer requirements.

specification:

The following are our regular continuous diamond stubbing grinding wheel specification:

name	Diameter / mm	Bore / mm	Segment height / mm	granularity	Connection	Adaptation machines
Diamond milling round	50	10/50	20/30/40	30 #	5/8 "-11	CNC machines, etc.
	86			60 #	M14	
	90			120 #	1/2-G	
	100					

The above specifications are for reference only, subject to special specifications can be customized on request.
