Product Description:

Brief Introduction:
Diamond gang saw blades are one of the most widely and most advanced tools used in cutting stone blocks.The diamond gang saw blades have the characteristics of high processing efficiency, high yield, high cutting accuracy, good surface evenness, high flexibility of plate size, saving water and electricity.

Features:
1.Using ultra high quality diamond powder, after coating titanium, reduce the heat damage.
2.High quality blank ensures smooth and efficient cutting.
3.Ultra vacuum hot pressing sintering technology to ensure the consistency and stability of products.
4.The sandwich structure is more stable in cutting and ensures the thickness, consistency and integrity of the plates.
All of our products have been strictly tested before access to market.

Specification:

Specification of diamond gang saw blade:

Steel Blank	Overall length (mm)	3950 4100 4400 4600
	Blade height (mm)	180
	Blade thickness (mm)	1.5 1.75 2.0 2.5
Segment dimension	Length (mm)	20-50
	Width (mm)	2.4/2.2 2.8/2.4 3.5/2.9 4.2/3.6

Reference data:

Cutting material	Cutting area	Cutting speed
Beige stone series	4000 m²	14-20 cm/h
Emperador stone series	20000 m²	12-18 cm/h
Serpenggiante series	45000 m²	16-18 cm/h
Sandstone series	8000 m²	45-80 cm/h
Artificial stone series	100000 m²	25-35 cm/h

Other specification can be customized according to need.

The following Only parts of diamond gang saw blades,If you want know more details, please contact us! **China Gang saw for stone cutting manufacturer**

Packing & Delivery:

1.Tools packing in carton cases;
2.Large machines packing in wooden cases;
3.When tools are in large quantities, they are packing in wooden cases.
