

Descriptions:

Diamond segment for gang saw blade, gang saw segment is welded on the substrate of gang saw with uniform size, which is helpful to improve the cutting speed.

At the beginning of using the row saw, it is necessary to enter downward at a low speed to make the row saw and stone adapt to each other. Once part of the blade bites into the material, gradually increase the downward feed speed until it reaches the normal working speed.

Feature:

1. Gang saw diamond segment is good sharpness. with stable processing efficiency.
2. Wholesale smooth surface segment used for cutting marble, limestone and other stone materials. good sharpness and long lifespan.
3. Not chipping diamond marble Segment is welded on the substrate of gang saw with uniform size, which is helpful to improve the cutting speed.

Specifications:

The Following Are Normal Specification **Flat Segment For Gang Saw:**

Segment Dimension	Usage	Machine
20×4.8/4.4×8(10)mm	Wet Working	Gang Saw Machine

The above specifications is only for reference, other specifications may be available as per customer's demand.

Product Details:

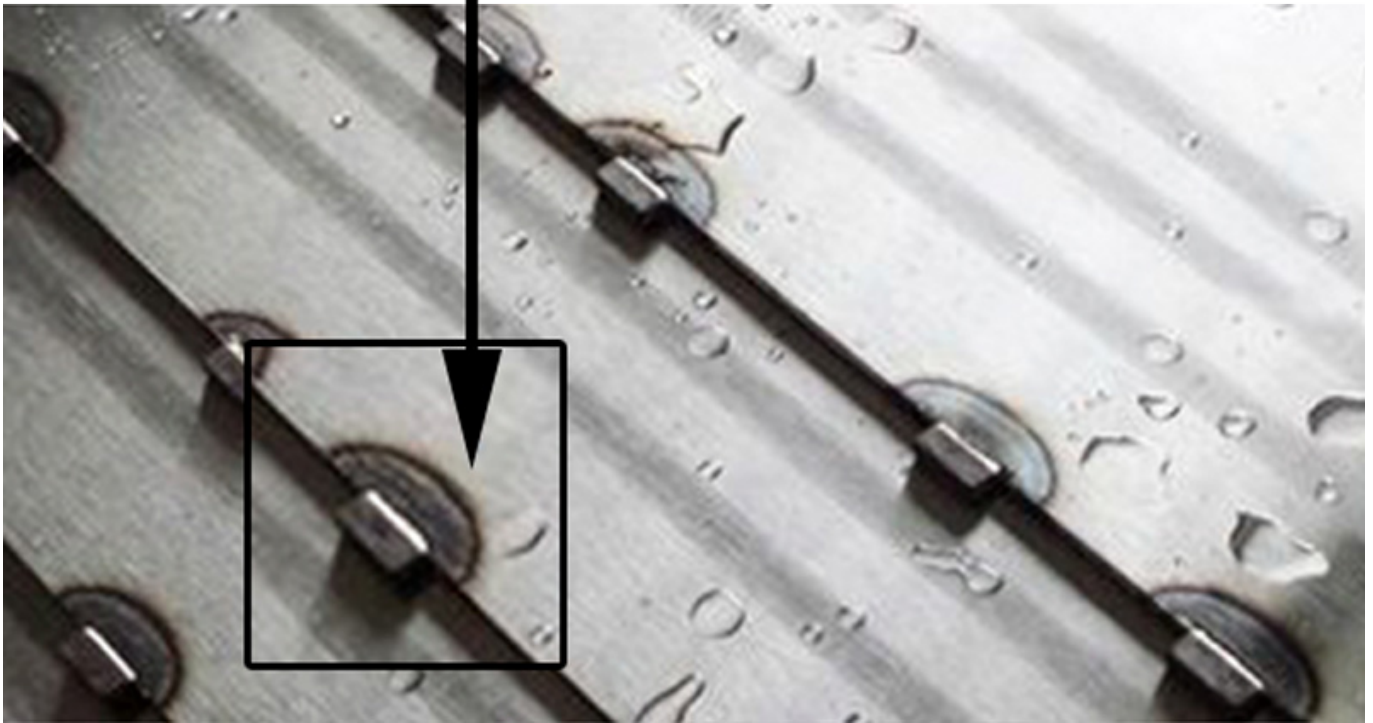

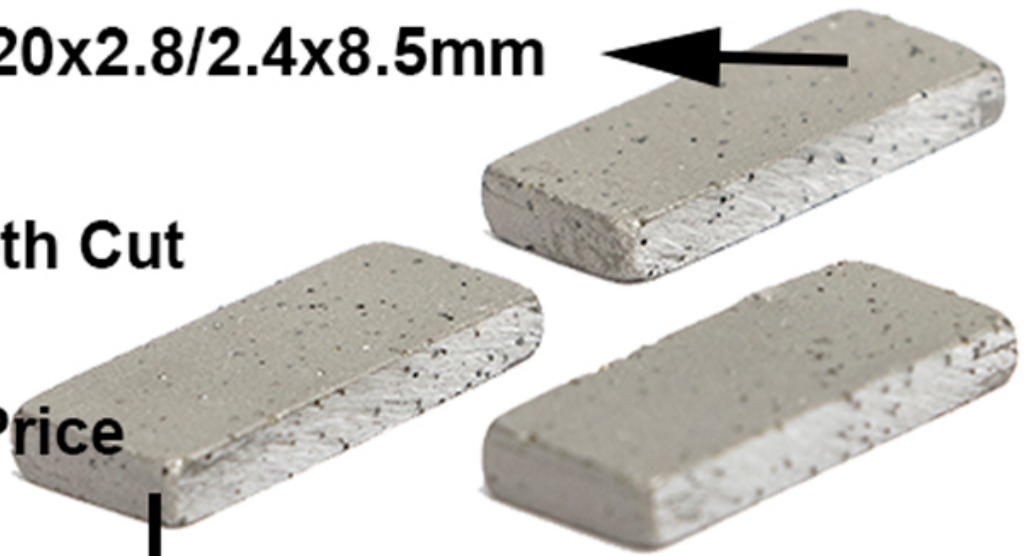

Not Chipping Diamond Marble Segment For Gang Saw Blade

Size:20x2.8/2.4x8.5mm

Smooth Cut

Good Price

Applications:

Gang saw diamond segment increasing the sharpness and stability or extending cutting life. The appearance of large diamond segment and packing can be designed to customers' requirement, it is to help customers better selling products and make sure that customers can have smooth sales and use connection between our diamond segment and previous one.

In order to assist in the cutting of stone blades, water is used as an abrasive medium to help cooling down the blade instead of steel bits.

Factory wholesale price gang saw diamond segment for marble block processing, In addition to gang saw heads, we also make saw blade heads, as long as you need them, we will

provide you with products.

Our service:

1. Low order quantity: It can meet the test order you need.
