

Introduction:

Diamond segmented grinding profile wheel installed in the line machine, milling machine, mainly for the granite, marble and other stone lines, line board processing, wear resistance and long service life. Size can be customized

Features:

1. stone grinding out uniform, do not waste materials
 2. High efficiency, grinding speed, size, precision
 3. Lines can be used for granite and marble processing
- The size can be customized according to customer demand

specification:

The following are the specifications of Diamond segmented grinding profile wheel

name	specification
Diamond segmented grinding profile wheel	D200 * d30 * 60T
	D150 * d30 * 60T
