

Introduction:

Diamond segmented stubbing wheel is mainly used for milling roughing granite stone, marble, etc., quartz and other stone surfaces, this diamond segmented stubbing wheel suitable for CNC milling machine, you can use both sides of the exchange.

Features:

1. Application on CNC machines, precision molding.
2. Good grinding performance, long life, low noise.
3. The two sides can exchange use and cost savings.

specification:

These specification are our diamond segmented stubbing wheel:

Outer diameter (mm / Inch)		Segment height (mm)	Thread Size
50	2	20	Φ10-2 + 2holes
86	3-3/8	20	Φ50-3 + 3holes
86	3-3/8	30	
86	3-3/8	40	
100	4	20	Φ50-3 + 3holes
101	4	30	
102	4	40	

Other special specifications can be customized according to our needs.
