

Introduction:

Diamond stubbing wheel for stone is mainly used for milling roughing granite stone, marble, etc., quartz and other stone surfaces, this diamond stubbing wheel for stone suitable for CNC milling machine, you can use both sides of the exchange.

Features:

1. Application on CNC machines, precision molding.
2. Good grinding performance, long life, low noise.
3. The two sides can exchange use and cost savings.

specification:

These specification are our diamond stubbing wheel for stone:

Outer diameter (mm / Inch)	Segment height (mm)	Thread Size
50	2	20
86	3-3/8	20
86	3-3/8	30
86	3-3/8	40
100	4	20
101	4	30
102	4	40

Other special specifications can be customized according to our needs.
