

Product Description:

Brief Introduction:

High precision brazing frame for diamond circular saw & core drill is a newly developed machinery for the industry. It's easy to operate, precise, stable & high cost to performance ratio, comparing to imported machine. The machine improves the brazing precision & torque strength of diamond circular discs and reduces sharpening & labor cost significantly.

Features:

We adopt easy design of halving to fix the position, which enable the worker to use the rack with basic training.

All of our products have been strictly tested before access to market.

Other specifications can be customized according to requirements.

Details:

Specification of diamond drill bits welding machine:

Brazing Range : Diameter 20-300mm, Height 40-500mm,

Brazing speed : 15-20 second per segment

Positioning accuracy : Surface of segment tolerance: $\pm 0.05\text{mm}$

Blade symmetry tolerance : $\pm 0.05\text{mm}$

Pictures:

The following shows are only part of diamond drill bits welding machine:

Note:

Other specification can be customized according to need.

Other Products:

[High frequency introduction welding machine:](#)

Packing & Shipping:

Diamond drill bits welding machine packing in the carton.

We can also pack the drill bit welding frame according to your requirements.

Special specifications need to be negotiated for delivery times.
