

Introduction:

The standard resin abrasive polishing pad are changing how new, hard troweled floors are polished. They cut fast and are long lived, especially on the hard troweled floors. Just two passes with our 100 grit resins on a mid weight or heavier grinder will typically reveal light salt and pepper, without grinding off the hard, long lived mechanically densified and dewatered surface layer.

Features:

1. Good quality resin with high polishing efficiency.
2. Long lifespan and stable performance.

Specifications:

Standard Resin Abrasive Polishing Pad

Diameter (mm/inch)	Grit No.	Thickness (mm)	Application
80mm(3")			
100mm(4")	50# 100# 200# 400# 800# 1500# 3000#	8-12mm	Concrete Masonry
125mm(5")			

The parameters only for reference, other specifications are available upon request.
