

## **Introduction**

High precision brazing frame for diamond circular saw & core drill is a newly developed machinery for the industry. It's easy to operate, precise, stable & high cost to performance ratio, comparing to imported machine. The machine improves the brazing precision & torque strength of diamond circular discs and reduces sharpening & labor cost significantly. All pneumatic systems, automatically halve to fix the position by electric control (set halving to 2~30 parts). Type C machine can automatically halve to fix the position, locate cutter head, heat, cool off and reset.

## **Features:**

We adopt easy design of halving to fix the position, which enable the worker to use the rack with basic training.

## **Specification:**

Brazing Range: Diameter 20-300mm, Height 60-500mm,

Brazing speed: 15-20 second per segment

Positioning accuracy: Surface of segment tolerance:  $\pm 0.05\text{mm}$ , Blade symmetry tolerance:  $\pm 0.05\text{mm}$
