

Introduction:

The BWM-SBPM01 Polishing machine for diamond saw blade is designed for polishing the base of diamond saw blades to get a brand new appearance, and the blade can be easier to be sprayed paint.

Features:

1. Cold grinding, heating the substrate to effectively reduce the distortion.
2. Adaptable, easy to operate.
3. Belt grinding contact with the substrate is flexible, has a good run together and polished effect.
4. Processing of high, high surface finish.

Specifications:

The followings are the normal specifications of our polishing machine for diamond saw blade:

Parameters	Numerical
Type	BWM-SBPM01
Polishing range	Ø200mm - Ø600mm
Dimension	1000mm * 850mm * 900mm
Belt Size	1310mm * 30mm
Belt speed	18-21 m/s
Sucker speed	300 r/min
Surface roughness	0.8 um
Face runout	±0.02 mm
Power supply	380V, 50HZ
Power	3 KW
Weight	180 Kg

The above specifications are for reference, other or special specifications can be ordered by customer s.
