

Introduction:

Polishing pad is easy to use. Removes densifier well. Spectacular floors. Floors stepped up another level. No resin build up on the floor. A lot quicker to use and has reduced time on the floor. 10mm mill thick. Lasting well over double the life of the common pad. We are getting up to 1000 sqm and more in most grits.

Features:

1. Good quality resin with high efficiency.
2. Long lifespan and stable performance.

Specifications:
