

Introduction:

Resin fickerts are widely used for fine grinding and accuracy grinding for slabs of granite,marble,quartz and ceramic.

These fickerts are used on automatic continuous polishing machines with high efficiency and long life span.

Features:

- 1.Resin fickert offers smooth polishing and glossy surface.
- 2.Its sharpness can reduce the pressure of grinding head,therefor reduce machines abrasion.
- 3.Its super sharpness can improve transmission speed of convey belt and improve the production efficiency.
- 4.It can bring glossy stone surface,without scratch or break slates while grinding.

Specifications:

The followings are the normal specifications of our resin fickert:

Product Name	Model	Specifications	Normal Grit No.	Applications
Resin Fickert	T140	140*56*15(20)	120# 180# 240# 320# 400# 800# 800# 1000# 1200# 1500# 3000#	Granite Marble Quartz Ceramic
	T170	170*56*15(20)		

The above specifications are for reference, other specifications can be ordered by customers.

Quality: Good quality,Premium.
