

Introduction:

Round silicon carbide hard rock abrasive brush is widely used on continuous automatic grinding machines etc,which is grinding granite,marble and artificial stone etc.

Features:

1. High grinding efficiency.
2. Long lifespan and stable performance.

Specifications:

The following are the normal specifications of round silicon carbide hard rock abrasive brush:

Product Name	Diameter(mm)	Material	Adapter	Grit No.	Applications
Silicon Carbide Abrasive Brush	80 100 125 150 180	Silicon carbide	Snail lock M14 5/8"-11	24# 36# 46# 60# 80# 120# 180# 240# 320# 400# 500# 600# 800# 1000# 1200# 1500#	Ceramic Tiles Granite Marble Artificial Stone

The above specifications are for reference, other specifications can be ordered by customers.
