

## Feature:

1. **Saw Blade With M Shape Diamond Segment**, it reduces vibration, noise, diamond exposure and cutting speed, small cutting groove, low pollution.

2. **Stone Cutting Segment Wholesales**, The thickness of the cutter head is generally thicker than that of the saw blade matrix. It does not rub with the saw blade matrix during cutting, so as to protect the matrix and reduce friction.

3. We also produce diamond segments in the field of cutting, grinding and drilling, such as concrete diamond blades uses, diamond grinding discs uses, diamond hole saw uses and other special uses.

4. The m shaped The cutter head has gradient slope design, fast cutting, low resistance and high sharpness.

## Product Description

Segment Length: 24mm

Segment Thickness: 11/10mm

Segment Height: 25mm

We can also manufacture the segment upon customers' requests

Saw blade with M shape diamond segment adopts sandwich design, and the size is 24x11/10x25mm. The length is 24mm, the thickness is 11mm and 10mm.

Because the cutter head adopts M-type design, it will have different thickness. See the picture on the details page. The height is 25mm.

Different size of diamond segments, used for cutting, grooving and slotting of various granite, marble, sandstone.

**Granite Block Diamond Segment Manufacturer**, welded to 2500mm single or multi blade saw blade. The cutter head uses high-quality diamond powder and metal powder.

## Product Specification:

The Following Are Normal Specifications **Saw Blade With M Shape Diamond Segment:**

Name	Segment Size			Pack each box	Application
	L	W	H		

2500mm Diamond Saw Blade Segment	24MM	11/10MM	25MM	130PCS	Granite, Sandstone, Various Hard Stone
----------------------------------	------	---------	------	--------	--

The above specifications is only for reference, other specifications may be available as per customer's demand.

**Other Specifications Of Cutter Segment:**

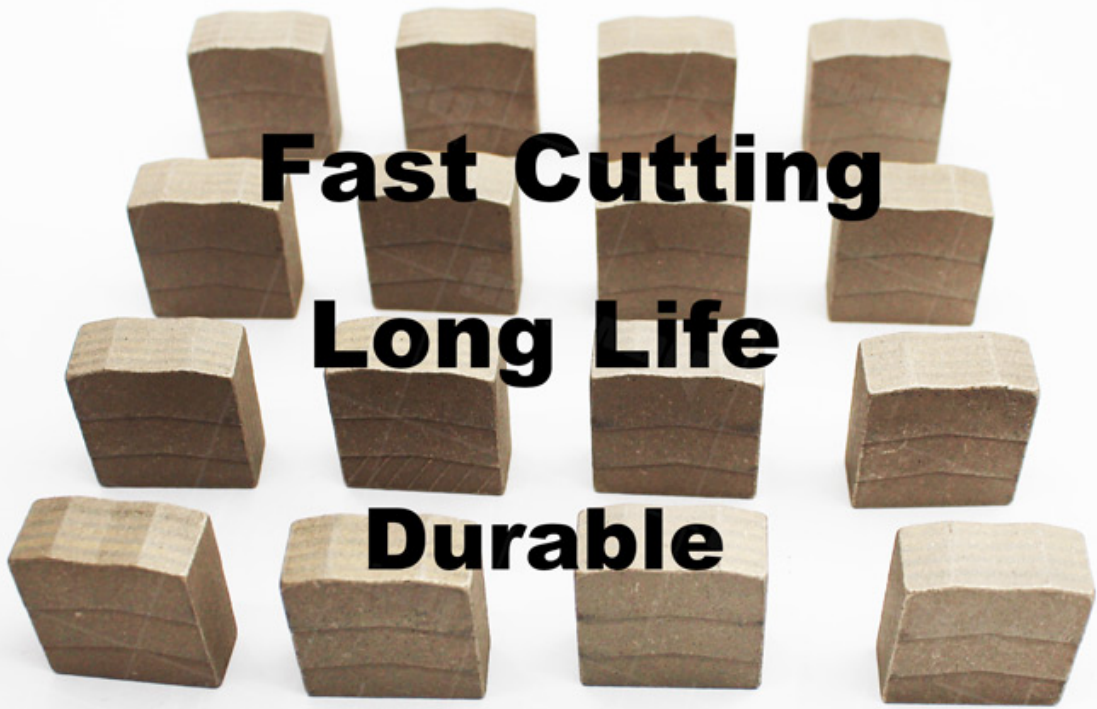

Diameter		Thickness	Teeth	Segment Size			Hole	Max. RPM	Cutting Stone
Inch	mm	mm	pcs/set	L	W	H	mm	RPM	#
10"	250	1.8(2.2)	17	40	3.2	8/10/12	50/60	3450	Granite

## Product show

### 2500mm Single Saw Blade with M Shape Diamond Granite Segment

**Fast Cutting**

**Long Life**

**Durable**

**Application:**

Saw blade with m shape diamond segment can be used in single saw blade and multi saw blade. using in block cutting for 900-3500mm circular saw blades for block cutting.

**[Multi Saw Blade Diamond Cutting Segment For Suppliers](#)**.Diamond saw blade segment for granite, sandstone, various hard stone.m shape diamond cutting segment for bridge cutting machine and single arm machine.

## FAQ

### 1.Can you accept OEM orders?

Yes, with professional design team, OEM orders are highly welcome.

### 2.Are you factory or trade company?

We are factory. And we have ourselves trading company.

### 3.Will you provide some spare parts of the machines?

Yes, of course.
