

Feature:

1. Increase friction and anti-skid effect.
2. Prepare before polishing concrete.
3. Quickly expose the aggregate in the concrete.
4. Alloy carbide bush hammer rollers for HTC floor grinding machine.
5. Bush hammer roller supplier china for texturizing and grinding concrete and stone or coating.

HTC BUSH HAMMER BLOCK

Product Description

HTC **three row bush hammer roller** is designed to pulverize the surface of concrete making it fast and easy to get to full aggregate exposure. It is also great for coating removal.

HTC Bush hammer roller is installed on the grinding disc of HTC, with 45 cutter segment of high-quality cemented carbide.

The basic function of the regular bush hammer is always the same - 30pcs/45pcs/60pcs of conical or pyramidal carbide tips welded at the top of a large metal plate.

Floor bush hammer can adapt to several kinds of grinder, from simple hand-held hammers to large electric machines, The repeated hit of these carbide tips into stone or concrete surface creates a rough, pockmarked texture that looks like naturally weathered rock.

Product Specification:

The followings are the normal specifications of our **three row bush hammer roller**:

Segment No.	Use	Blank
45 Teeth	HTC Bush Hammer Plate	HTC Metal Blank
