

Introduction:

Vacuum brazed finger bits D20 are used for drilling the sink hole in various stones, such as granite, marble and so on. There are some water holes in the bottom and side edge, they can make it more efficient to cool and remove impurities. It has long lifespan and high efficiency.

Features:

1. High efficiency, long lifespan.
2. Good balance, stable performance.
3. Smooth drilling on various stones.

Specifications:

The followings are the normal specifications of our vacuum brazed finger bit:

Product Name	Diameter	Connection	Segment Length	Bottom Segment
Vacuum brazed finger bit	20mm	1/2" Gas M14 5/8-11"	40mm	Optional
	25mm		45mm	
	30mm		50mm	
	35mm		60mm	
	40mm			
	50mm			
	60mm			

The above specification is just for a reference. Other specifications can be ordered by customers.
