

Introduction:

The BWM-
HM hammer machine for diamond saw blade is designed for removing the old waste segments of diamond saw blades.

Features:

1. The substrate is not deformed, the life of the matrix increase.
2. Fast delivery rate, easy to operate. Auto dismantling scrapped heads.
3. Students pay high efficiency, 400-500 pcs/shift.
4. 220V power supply design. No rail design, increase machine life.

Specifications:

The followings are the normal specifications of our hammer machine for diamond saw blade:

Parameters	Numerical
Type	BWM-EM02
Power	1.1 KW
Power supply	220V, 50-60HZ
Operating Range	ø300MM - ø600MM
Weight	90 KG

The above specifications are for reference, other or special specifications can be ordered by customer s.
