

Introduction:

Turbo segment diamond core drill bits are suitable for stand drilling machine, electrical hand-held drillers or CNC machines for dry drilling small projects such as drilling our sinkholes for faucets or small holes on slabs. The turbo segments provide faster drilling speed than normal drill bits.

Features:

- 1. Applicable for most stand drilling machines, hand-held drillers or CNC machines.
- 2. These drill bits are mainly for dry use.
- 3. Good balance and stable performance.
- 4. Turbo segments provide higher drilling efficiency.
- 5. Diamond vacuum brazed or electroplated on the surface of steel pipe.
