

Introduction:

Diamond fickert metal abrasive blocks

are widely used for grinding slabs of granite,marble,quartz and ceramic from coarse to fine. These fickert metal abrasive

blocks are used on automatic continuous polishing machines with high efficiency and long life span,cost lower than magnesia grinding blocks.

Features:

1.Diamond fickert metal abrasive block offers smooth polishing and longer lifespan.

2.Its sharpness can reduce the pressure of grinding head,therefore reduce machines abrasion.

3.It can bring 10 degree more in stone high glossiness,without scratch or break slates while grinding.

Specifications:

The followings are the normal specifications of our diamond fickert metal abrasive block :

Product Name	Model	Specifications	Normal Grit	Applications
Diamond Fickert Metal Abrasive Block	T130	130*56*15(20)	36# 46# 60# 80# 100# 120# 140#	Granite Marble Quartz Ceramic
	T140	140*56*15(20)	180# 240# 320#	
	T170	170*56*15(20)		

The above specifications are for reference, other specifications can be ordered by customers.
