

**Introduction:**

The Fickert system is most popular simple and effective abrasive mounting system used in stone processing in industry. The dovetail locking makes the removal of worn out abrasive and remounting of abrasive system has widely. Adapting polishing machine as well as line polishing machine with different level of modifications. It has been well known for its cost effectiveness and many benefits compared to silicon carbide based abrasive system. Today it is still proven as a most economic system for stone processing both for grinding and polishing.

**Features:**

1. High smooth and longer lifespan.
2. Without scratch or break slates.

**Specifications:**

Resin Bond Fickert Abrasive Brick:

| Product Name           | Model | Specifications | Grit No.  | Applications                        |
|------------------------|-------|----------------|---|-------------------------------------|
| Fickert Abrasive Block | T140  | 140*56*15(20)  | 36# 46# 80#<br>120# 180# 240# 320#<br>400# 600# 800# 1200#<br>1500# 3000# Lux | Granite<br>Marble<br>Ceramic<br>etc |
|                        | T170  | 170*56*15(20)  |   |                                     |
