FAQ

FAQ

1. Will the teeth of the bush hammer roller fall off ?

of course not, We use high-strength flux to weld the carbide tip to the grinding wheel. The grinding wheel is sturdy and durable, with a long life, and the tip is not easy to fall off.

2. When inquiring about products, what information do I need to provide?

You can inform the specifications of the required product, the target of the product, the machine that the product uses, or use the picture to communicate with our staff, and you can also customize the product according to your requirements.

3. What can Bush Hammers do?

- Make a safe non-slip surface on natural stones.
- Remove old glue and resin coatings, especially thick resins.
- Eliminate any surface and create an antique surface.
- Prepare the floor before laying a new coating.
- Expose the aggregate to the concrete floor to prepare for concrete polishing.
