

Introduction:

The resin bond bricks are used to processing all kinds of hard materials such as marble, granite, terrazzo, etc and improve The precision, especially suitable for full-automatic production line of granite polishing, good sharpness, strong cutting ability, durable and cost-effective.

Used on automatic polishing machines.

Feature:

1. Good polishing efficiency.
2. Long using life.
3. The highest quality.
4. Less pollution

Specifications:

The are the normal specification of the resin bond bricks:

Length	Height	Grit No.
140mm	15-20mm	#120, #220, #320, #400, #800, #1000, #1200, #1500, #3000

The above specification just a reference for clients. Other specification can be ordered by customers.
